AGENDA

- **What are Element Templates**
- **How to use Element Templates**
- **Why use Element Templates**
- **Where to use Element Templates**
- **When to use Element Templates**

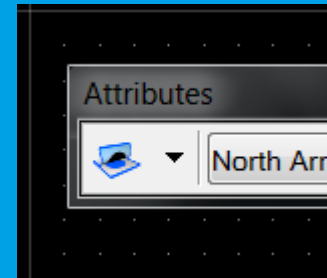

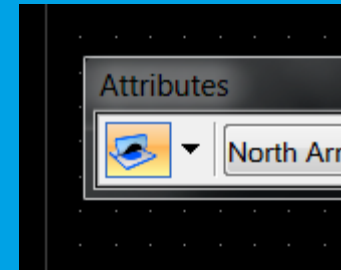

WHAT

- A set of rules that define the characteristics of an element
- Common properties include level, color, ***STYLE***, and weight
- Many additional advanced properties

HOW

- Pick a template
- Choose to associate or not
- Pick a tool

DEMO

WHY

- Help maintain a controllable standard
- Rolling out standard updates are easier
- Peripherals and next generation software going towards Element Templates

DEMO

WHERE

- Similar to levels they live in the active file when in use, but are referenced through dgnlibs.
- Created through Element->Element Templates
- Elements update automatically as their local copy of the template updates

WHEN

- **Element Templates can be associated with custom tasks**
- **Tools then produce only standard deliverables**
